

SPOT TRACE

Brand: Spot
Product Code: Spot Trace
Call for Price: 07 3277 0237

Description

SPOT TRACE SATELLITE TRACKING DEVICE

SPOT Trace offers advanced tracking for your most valued assets.

Instantly receive a text or email when movement is detected and follow on Google Maps on your phone or computer.

The SPOT Trace is a compact, low cost asset tracking and motion alert device, powered by 100% satellite technology on Tracertrak. The tiny, lightweight device is simple to install and when used with Tracertrak it gives full visibility of asset location as well as alerting the user to any unauthorised movement.

The SPOT Trace on Tracertrak provides near-real-time location information on anything from vehicles and trailers to plant and machinery, meaning your organisation spends less time searching for assets on remote sites and more time utilising your valuable resources.

Movement Alerts

Receive SMS or email messages when movement is detected

Real-Time Monitoring

Monitor your assets in near real time using Google Maps™

Satellite Tracking

Satellite technology tracks beyond the reach of normal mobile network coverage

Tracking Interval Settings

Choose your tracking intervals from 5, 10, 30 or 60 minutes – upgrade to Extreme Tracking for 2.5 minute tracking intervals

Mounting The SPOT Trace

The SPOT Trace uses satellites to send tracking points and messages, so its signal needs a clear path to the sky. The signal will go through glass and fiberglass but not through metal or wood.

Please note: use of satellite telecommunications services and devices may be prohibited or restricted in some countries.
